

Assignment # 1

Name: Pavittar Singh

Student No # 200238210

Advanced web programming

Week # 1

Date 28-sep-2014

Purpose: This website is designed for the purpose for personal Portfolio. As per requirement, I designed 6 Tab. This is kind of my first portfolio which I going to launch on github.com.

Design: The design of this website, has 6 tab, Home, about me, projects, services, GitHub and contact me. I would like to put a screen shot of output as well.

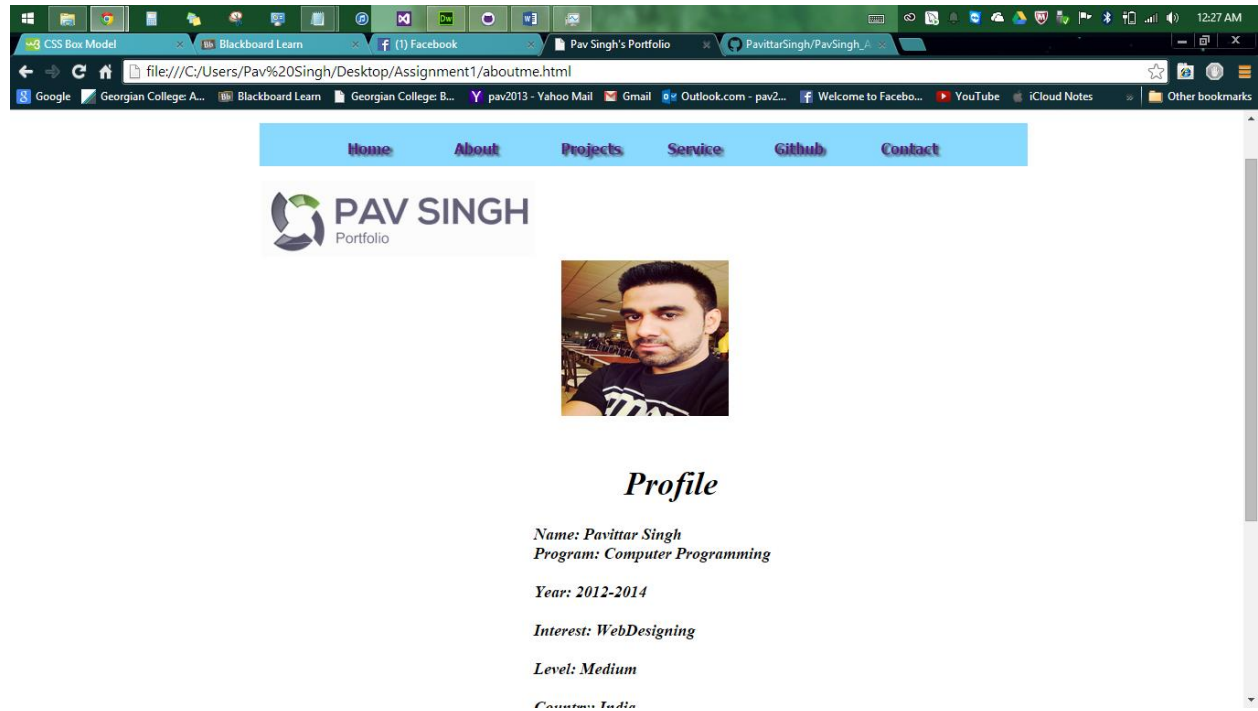

Logo: Logo designed unique.

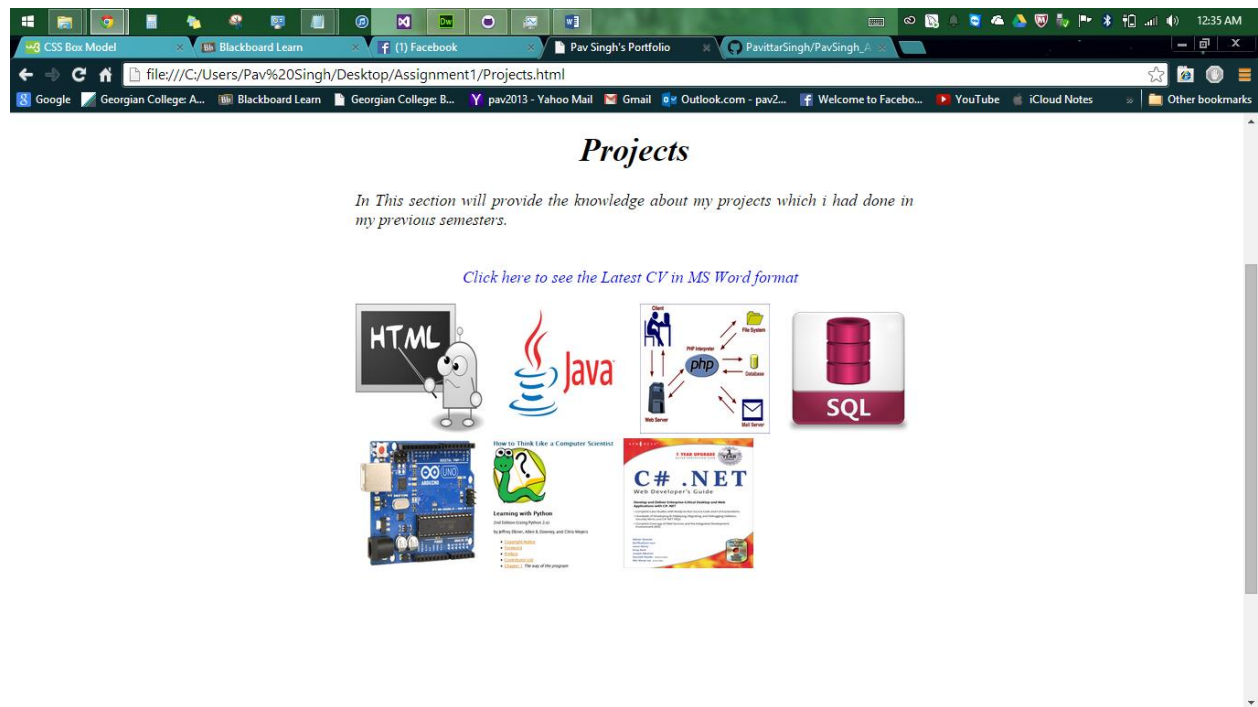

Functionality:

1. Home: According to requirements, I designed the home page with 6 tabs, one slider, Stay connect social media services, Copyright (footer). The unique Logo designed for give an identification to this website. The welcome statement have been created with title of welcome. The feature work slider designed for see the next work with pictures.
2. About Me: The second page about me has been designed with personal picture and bio section with latest CV about me.
The active Nav bars working while pressing tabs. The footer available under the website included social service links.
3. Projects: The Nav bar clearly shows the active tab and in this page, I gave some links about my previously projects, so just need to click the link to get the route of my work.
The footer available under the website included social service links.
4. The service page: is designed for some service which I plan to provide in future so I design an online registration form which include first name last name and such detail about person who is interested for services. Again footer of copyright content is included in this website.
5. GitHub: GitHub is the best place to share code with friends, co-workers, classmates, and complete strangers. Over six million people use GitHub to build amazing things together. I am going to put a link of my GitHub Account so anyone can follow me on GitHub.
6. Contact me: I used google map option for find me online and this link will provide the view direction as well.

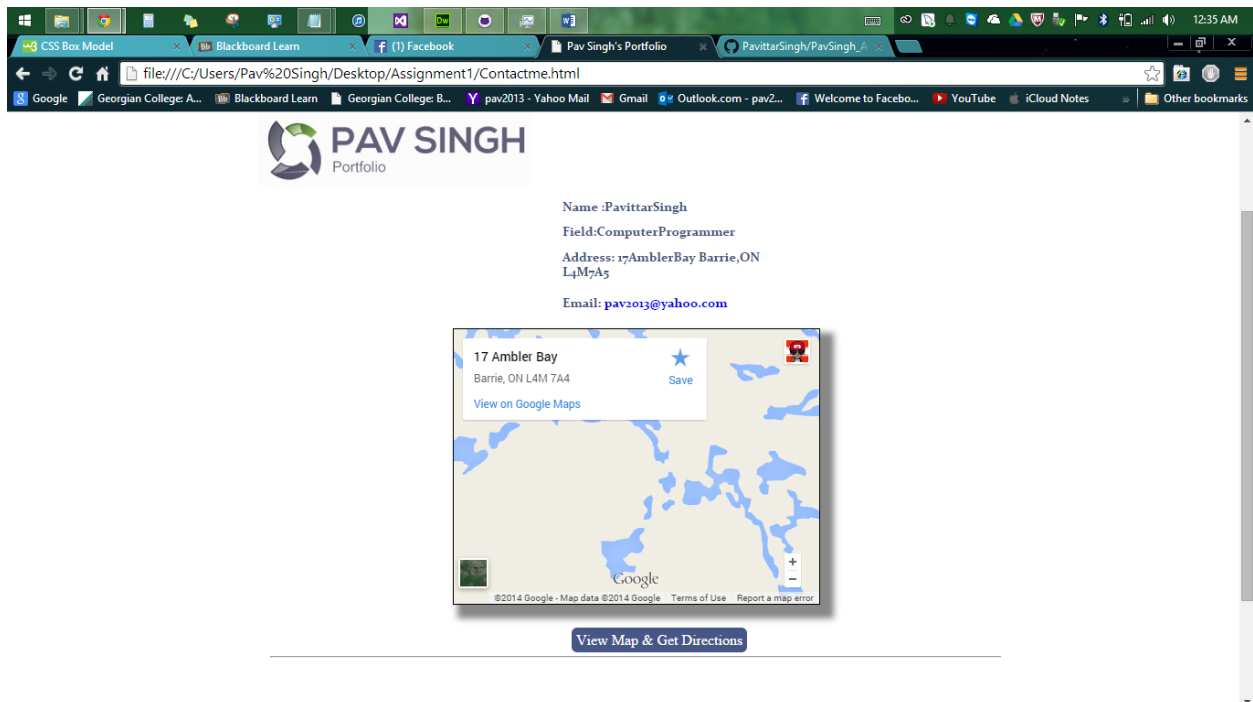

Branding Section: there are some samples of website:
